Ever evolving,  
ever deepening,  
the mystery of  
who you are

*A person of discernment will attempt to read all about  
you in the character of the rooms where you  
dine, entertain, write messages,  
sleep and bathe.*

A large, ornate crystal chandelier hangs in a room with a window and a chair. The chandelier is made of brass and crystal, with many hanging crystals and a central candle-like light. The room has a window with a decorative frame and a chair with a blue and gold patterned seat. The overall scene is elegant and classic.

*This is why monarchs in past centuries sank so much of the national treasury into decorating, why interior designers today might be seen as psychologists of sorts, and why we plan with passion and precision every texture and object in a room.*

*The choice of a Schonbek crystal chandelier is pivotal. It makes a mere space into an aesthetic statement. And it's a compliment to your acumen. A Schonbek chandelier possesses all the qualities of a collectible: originality, craftsmanship, history.*

*Schonbek has been making crystal chandeliers since 1870. It was founded in Bohemia by Adolf Schonbek, one of a long line of Schonbeks who dedicate their lives to beauty. Historic Schonbek crystal hangs in Buckingham Palace and the White House.*

*The prismatic luminosity of a Schonbek crystal chandelier creates an amazing, caressing quality of light, rendering every gesture significant, every gathering glorious. You'll feel like the star of your own movie when you live with a Schonbek.*

# Crystal

## a collector's guide

The buyer of crystal is at heart a collector, and understands the importance of choosing a chandelier of heirloom quality. Schonbek chandeliers are trimmed with the finest imported crystal.

Our ancestral knowledge of crystal runs deep. Bohemia, site of the first Schonbek factory, was the world's leading producer of fine crystal in the nineteenth century.

Crystal may be machine-cut, handcut or molded. Within each crystal type, we buy only first-quality.

### **Strass® Crystal**

Finest crystal in the world, Strass® is manufactured by Swarovski AG in the Austrian Alps. It is machine-cut and polished to achieve perfect optical clarity, razor-sharp faceting and unique purity and brilliance. Lead content is in excess of 30 percent. An invisible coating makes Strass easier to clean. To protect buyers from imitations, the Strass logo is engraved in miniature inside each crystal.

### **Swarovski Spectra® Crystal**

A passion for perfection has made Swarovski the world leader in the production of cut crystal. This crystal grade offers a high degree of brilliance and an attractive price.

### **Heritage Handcut™ Crystal**

The methods of producing this crystal go back centuries. First the crystal is cut by hand in two stages on an iron and then a sandstone wheel. Then each crystal is polished on a wood wheel with marble dust. You may notice faint traces of the wood wheel – a mark of authenticity. Our crystal makers put aside their first-quality handcut crystal for us, and we select the best of the best from this choice inventory. In some cases we ourselves have trained artisans in the ancient craft of cutting and polishing crystal.

### **Optic-Quality Heritage Handcut**

A Schonbek innovation. This exceptionally fine handcut crystal, formerly used only in optical equipment and scientific instruments, is remarkably refractive.

### **Handcut Bohemian French Pendeloques**

The molds used to make these classic handcut pendeloques were in the possession of the Schonbek company (then in Bohemia) over one hundred years ago.

### **Gemcut™ Crystal**

Gemcut™ is first-quality, machine-cut crystal of a clarity and flawlessness beyond industry standards. It is characterized by prismatic brilliance, visual purity, sharp faceting and precise polishing.

### **The Vintage Collection™**

This crystal reminds us of estate jewelry. Heirloom shapes include whimsical little beads, dainty droplets and tiny antique-style faceted ovals. Chains upon chains of fanciful beading or jewel-like octagons recall forgotten fashions.

### **The Legacy Collection™**

This crystal comes from the historic glass-making region around Venice. Venetian crystal is molded and fire-polished rather than cut, which results in a subtle luminosity. It is modestly priced, compared to cut crystal.

# Art from the earth

Rock crystal has been sought after over the ages by collectors, whether carved into art objects or used to trim crystal chandeliers.

The raw quartz is mined, not manufactured. It requires great artistry to cut and polish because of its natural complexity. It cannot be mass-produced.

Early rock crystal chandeliers first appeared in the sixteenth century. The Schonbek staff explorer bushwhacked his way through a remote jungle to find rock crystal of exceptional quality.

## Nature's signature is clear in every crystal

Wondrous fissures and mists, a million years in the forming, make each crystal unique in the universe.

Skilled gemcutters grind, cut and polish each rock crystal by hand. Polishing one crystal to perfection might take a week. And the rejection rate is high. For the one crystal chosen to ornament a Schonbek chandelier, a dozen or even a hundred crystals may be set aside and sold off for commoner uses.

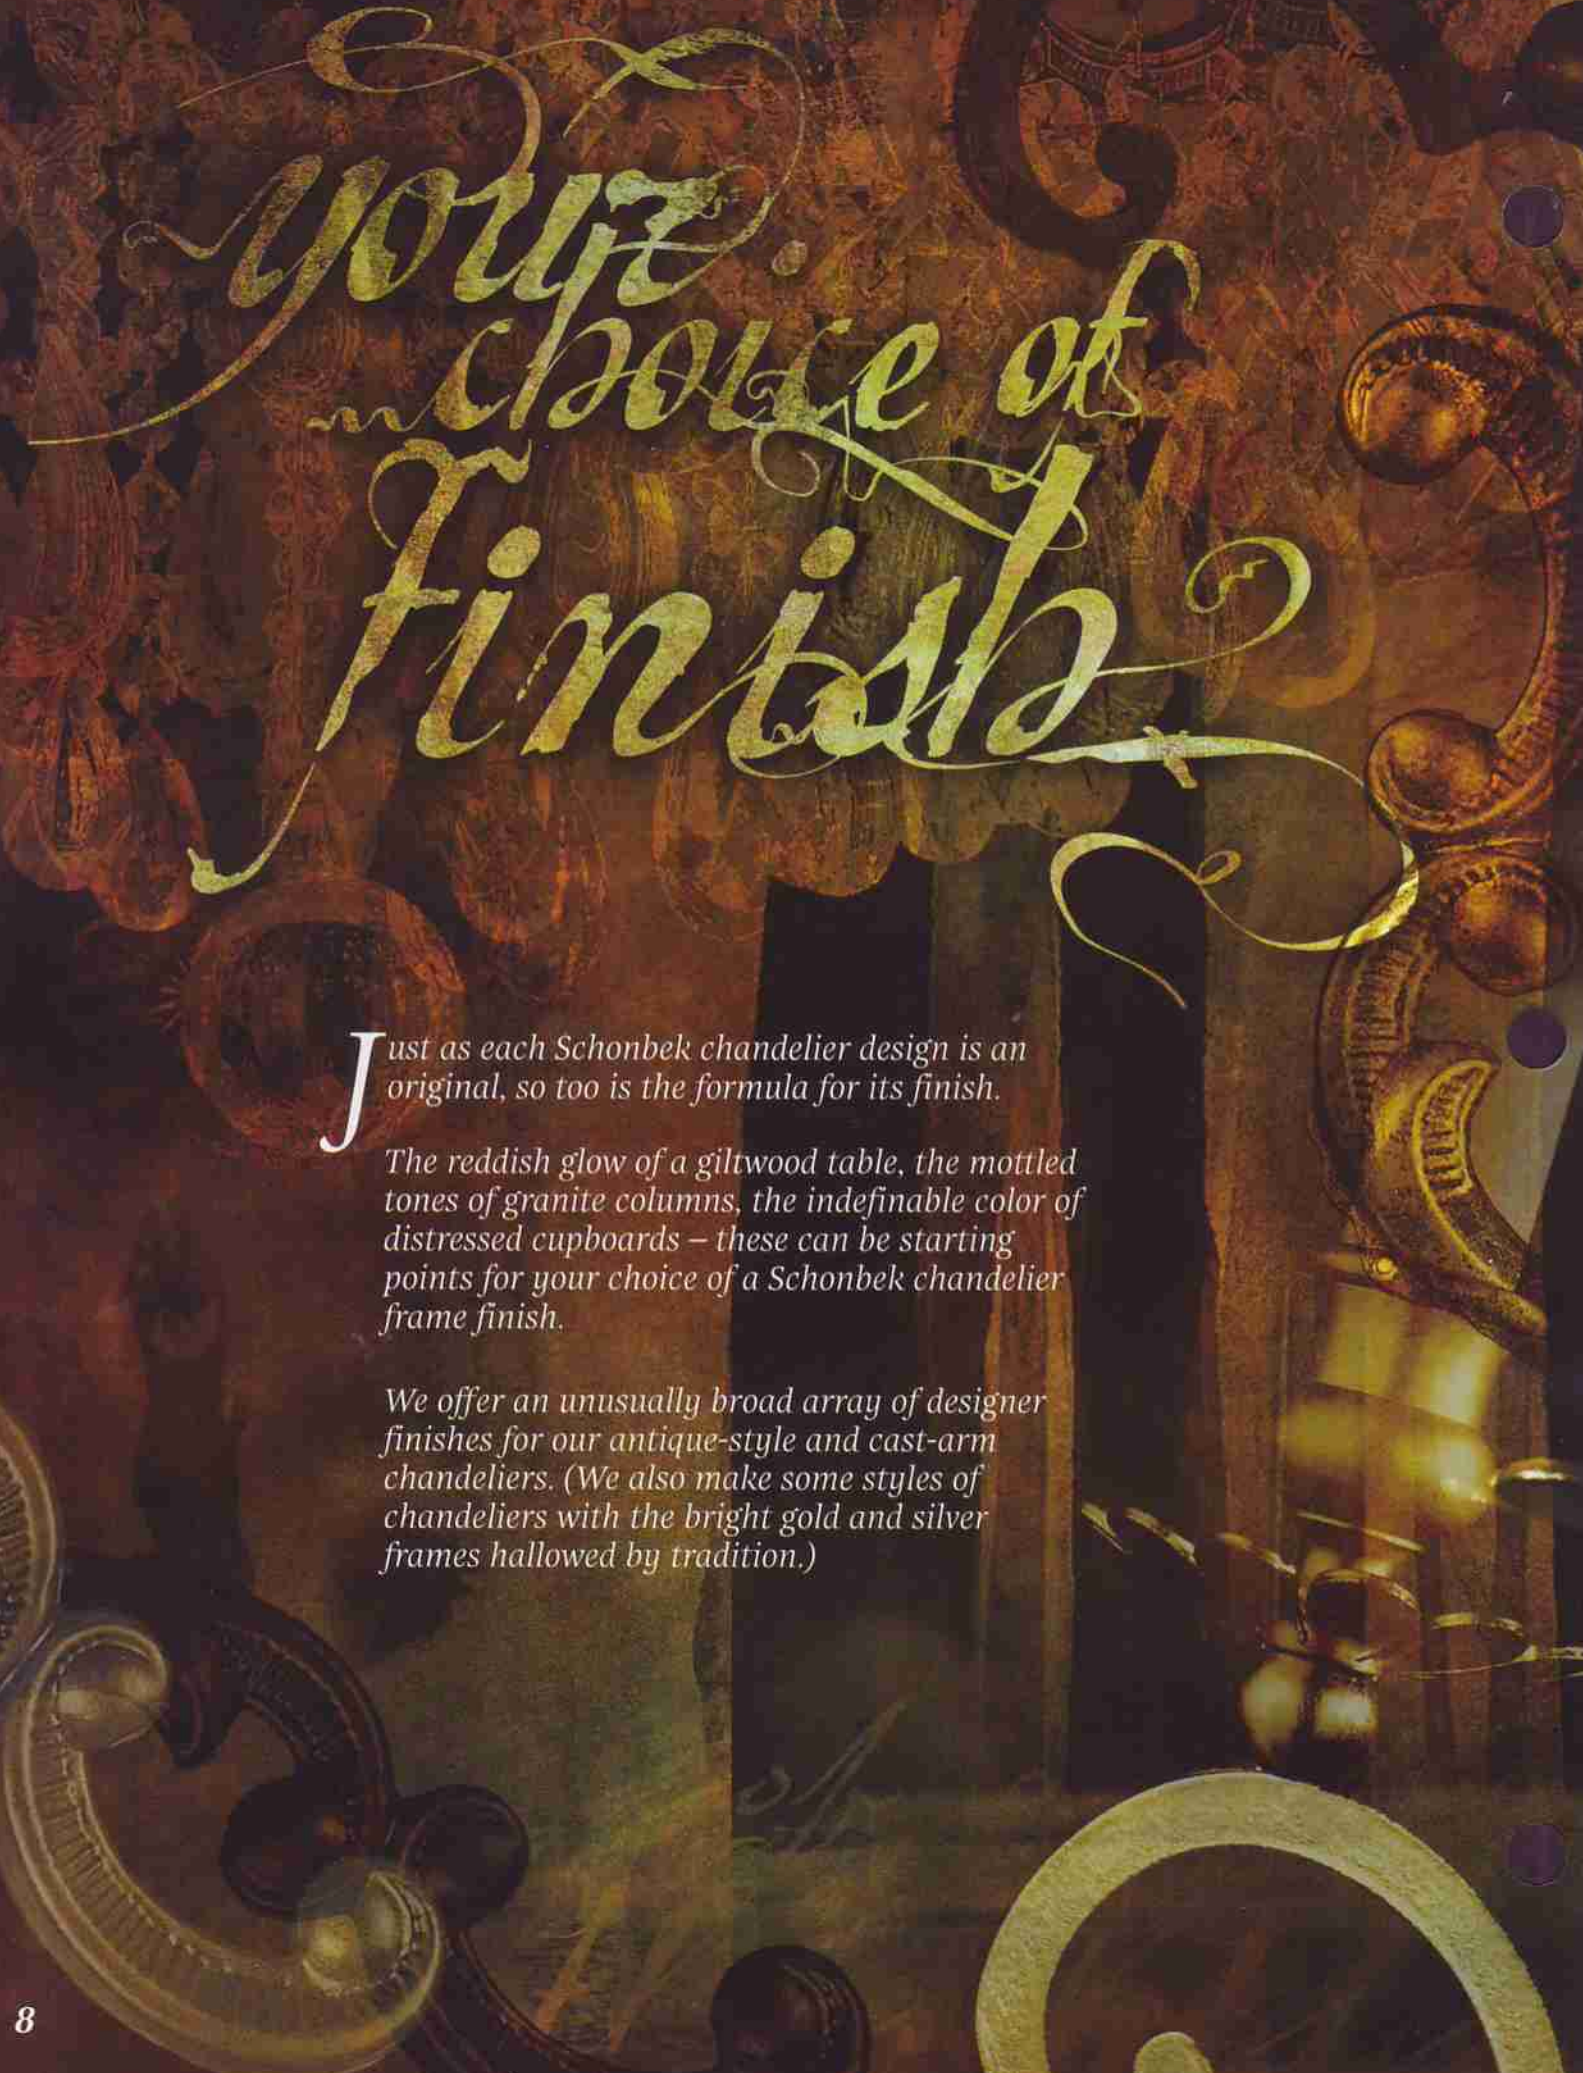

**Eternally mysterious, forever cool**

Authentic rock crystal is cool to the touch in any weather. Sublime geological events created this mysterious coolness. In ancient times and warm climates, great ladies coveted jewelry of rock crystal for the sensation of coolness against the skin.

The amethyst displayed in some Schonbek designs is a natural quartz tinted by traces of iron.

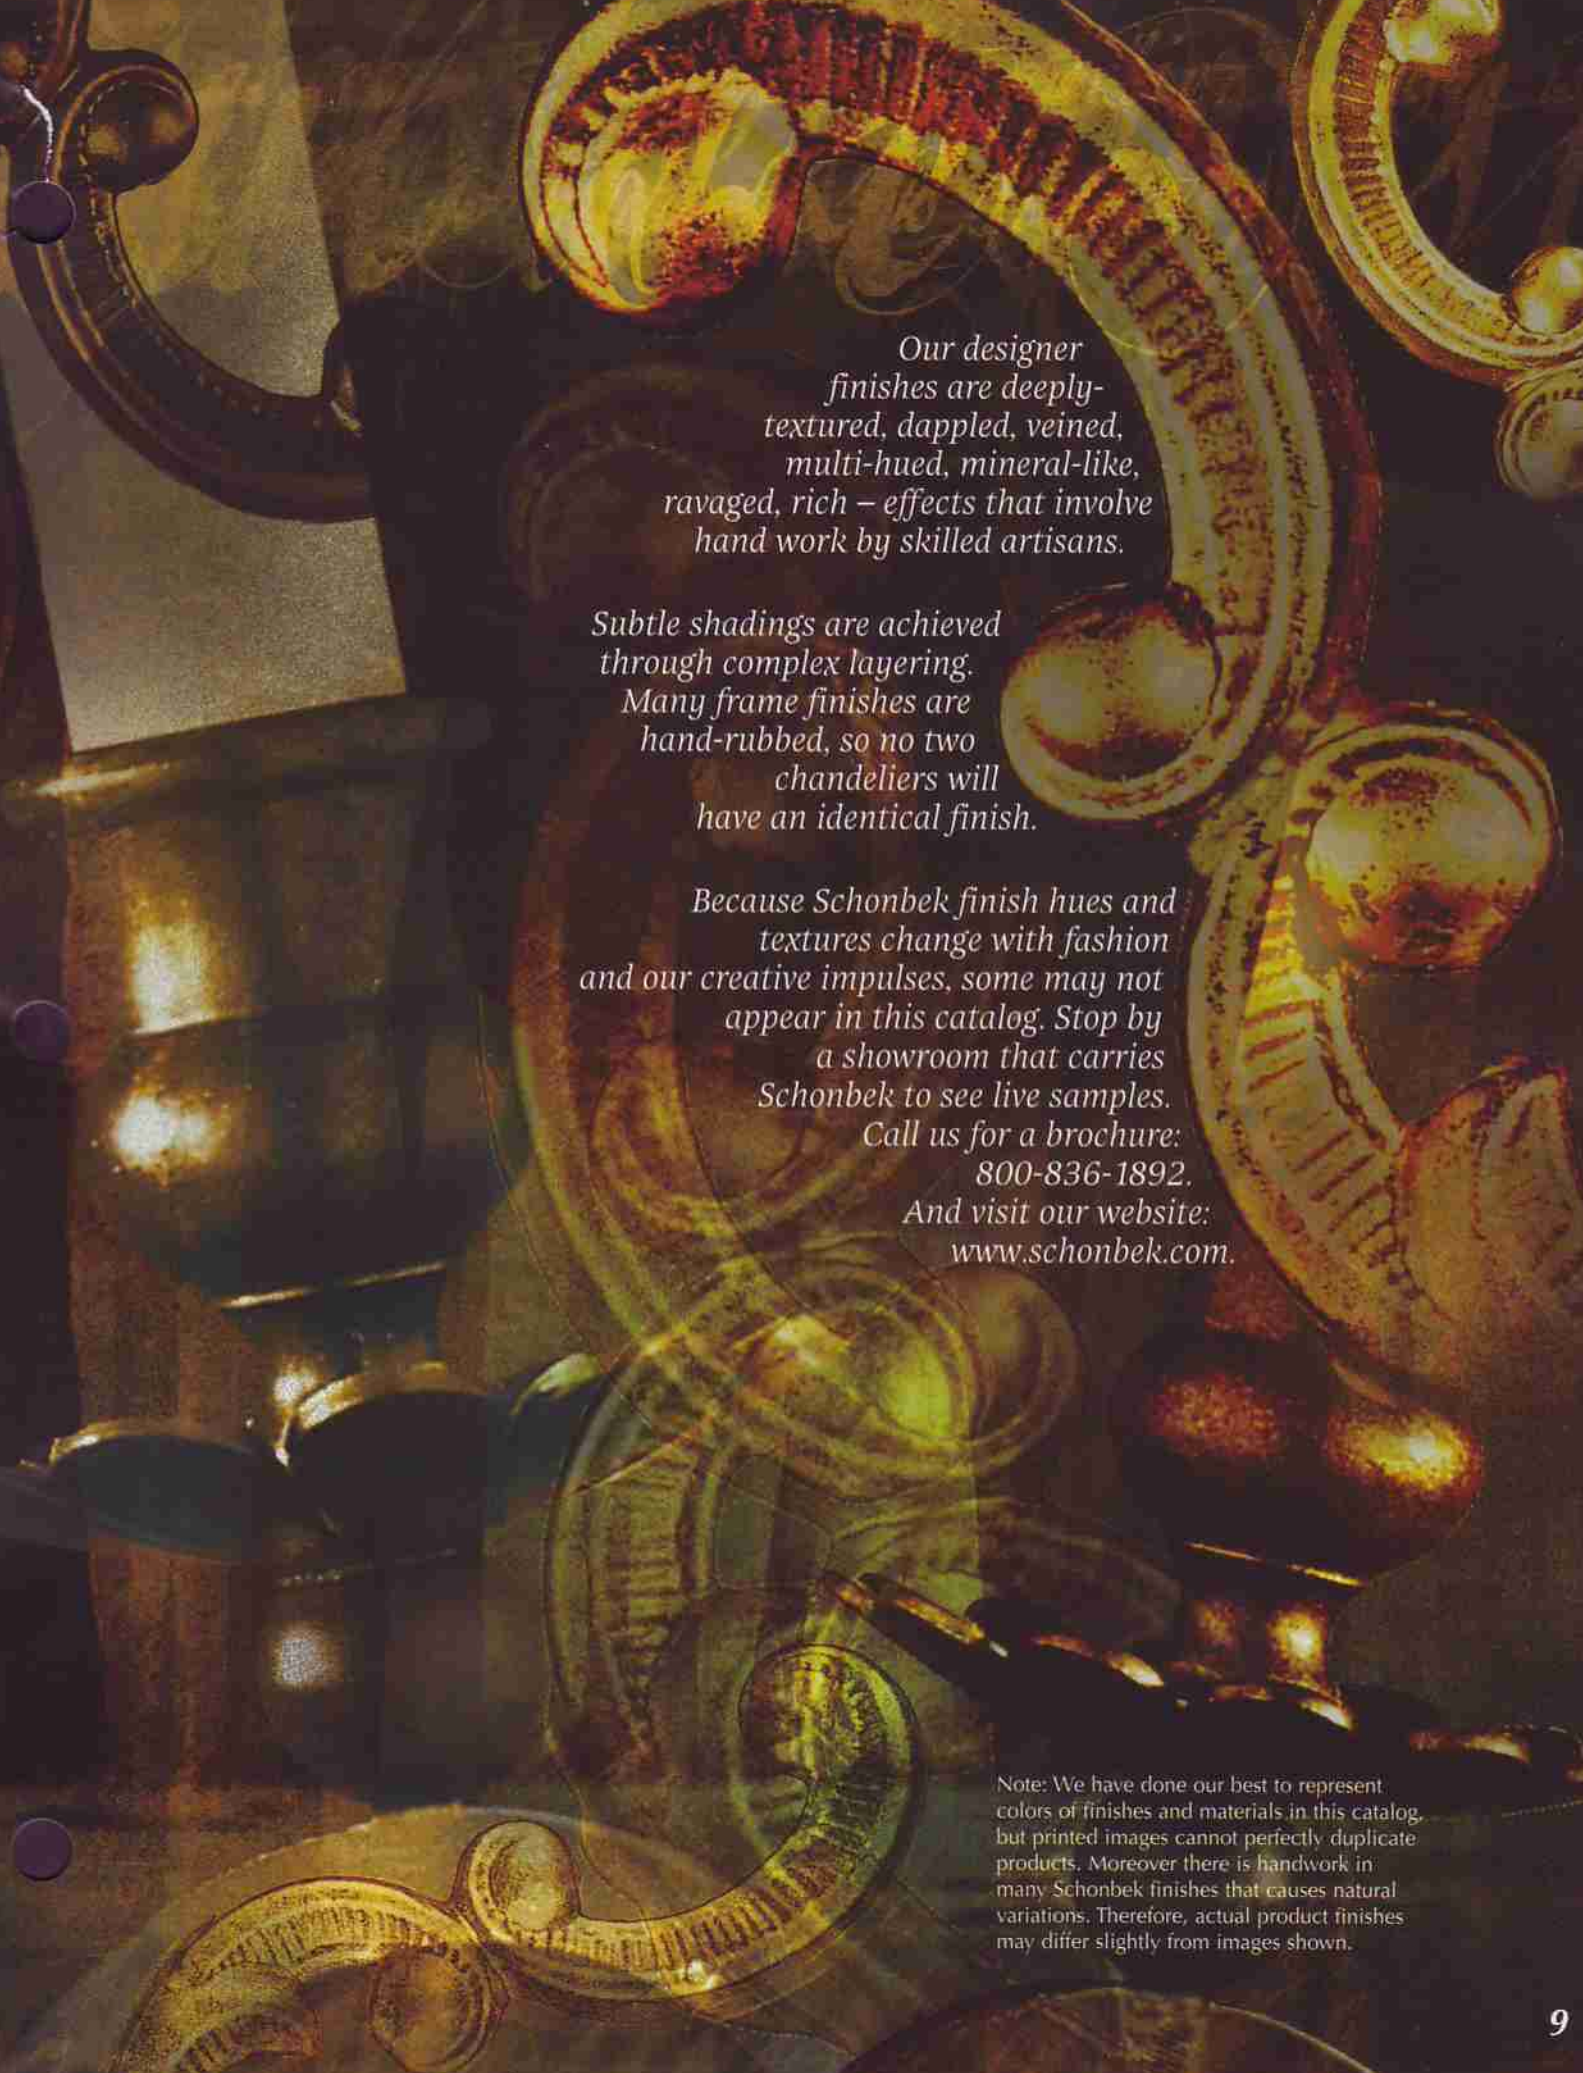

# Your choice of Finish

*Just as each Schonbek chandelier design is an original, so too is the formula for its finish.*

*The reddish glow of a giltwood table, the mottled tones of granite columns, the indefinable color of distressed cupboards – these can be starting points for your choice of a Schonbek chandelier frame finish.*

*We offer an unusually broad array of designer finishes for our antique-style and cast-arm chandeliers. (We also make some styles of chandeliers with the bright gold and silver frames hallowed by tradition.)*

*Our designer finishes are deeply-textured, dappled, veined, multi-hued, mineral-like, ravaged, rich – effects that involve hand work by skilled artisans.*

*Subtle shadings are achieved through complex layering. Many frame finishes are hand-rubbed, so no two chandeliers will have an identical finish.*

*Because Schonbek finish hues and textures change with fashion and our creative impulses, some may not appear in this catalog. Stop by a showroom that carries Schonbek to see live samples.*

*Call us for a brochure:  
800-836-1892.*

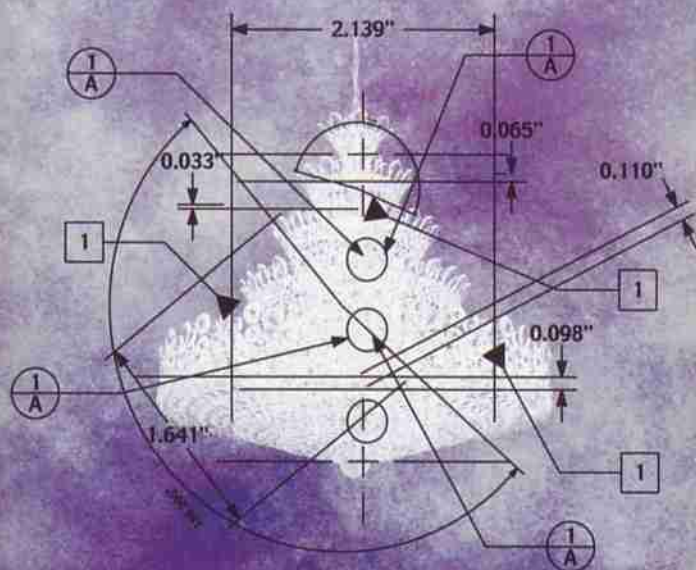

*And visit our website:  
[www.schonbek.com](http://www.schonbek.com).*

Note: We have done our best to represent colors of finishes and materials in this catalog, but printed images cannot perfectly duplicate products. Moreover there is handwork in many Schonbek finishes that causes natural variations. Therefore, actual product finishes may differ slightly from images shown.

# COMMERCIAL PROJECTS

## SPLENDOR ON A GRAND SCALE

39"

In the ballroom of the Sheraton Waikiki, Schonbek chandeliers shaped like giant hibiscus flowers are programmed to change colors to the tempo of a light show.

In the Paris Las Vegas theme resort, 67 Maria Theresa crystal chandeliers and 198 crystal wall sconces illuminate scenes that recall the Chateau de Versailles.

Schonbek chandeliers appear in the James Bond movie "Die Another Day." (See "Jubilee" in this Catalog.)

Schonbek commercial designs may be seen in hotels, casinos, restaurants, religious institutions, public buildings and private estates around the world.

Past projects include Atlantic City's Taj Mahal Casino, Nemacolin Woodlands Resort & Spa in Pennsylvania, the Indonesian Embassy in Washington D.C., the Presidential Palace in El Salvador, the Ambassador Hotel in Hsinchu (Taiwan), Drury Lane Theatre in Chicago, the king of Malaysia's Royal Palace, to name just a few.

The Schonbek company has a repertoire of hundreds of designs reflecting every period of crystal history from Renaissance to postmodern. These designs can be readily adapted for large commercial projects. Or we can create a design unique in the world to realize a vision of yours.

For free literature and information on custom and/or commercial work call 1-800-836-1892.

# The Custom Schonbek.

*If a chandelier is possible in the realm of ideas and the world of physics, we can build it.*

*You may have a foyer of unusual dimensions that you're finding difficult to light with sufficient drama.*

*There may be a pattern or shape in your wall treatment that you want to reflect in the design of your chandelier.*

*Perhaps you saw a photo in an art book of some historic crystal chandelier that you'd love to duplicate for your own personal delight.*

*You may be in love with amethyst, smoky quartz or some other uncommon material that you want woven into a chandelier design.*

*Or you may simply prefer your crystal chandelier to be one-of-a-kind, like the other furnishings in your home.*

*These are occasions for a custom chandelier by Schonbek.*

*We manufacture our original designs in our own factory and are undaunted by technical challenges. Our Custom Department will gladly work with you, your interior designer and/or architect.*

*The project can be managed through a lighting showroom near you. Authorized Schonbek distributors are experienced in handling custom Schonbek designs.*

*Our mission is to continuously develop the strengths and creativity of each one of us and grow together as a productive community leading the worldwide industry in providing innovative lighting products of lasting beauty, as well as exceptional value and integrity.*

*Vertically Integrated*

*Customer Focus*

THE  
SCHONBEK

*Total Quality*

The truth about many crystal chandeliers on the market is that they are routinely pieced together out of components from various manufacturers.

We are a vertically-integrated manufacturing facility, creating our chandeliers from raw materials. If we have an idea that is impossible to realize with existing technology, we invent a new technology.

Our factory is state-of-the-art. Yet Schonbek chandeliers also contain a great deal of painstaking craftsmanship. Handsetting of crystal jewels, hand-rubbing of finishes, handcastings produced in our own foundry exist side by side with sophisticated computer-aided design.

We see every detail of our operation as offering potential for adding value to our product. For example, we continually strive to eliminate waste. Our factory is visually organized so that anything can be found in 30 seconds.

From user-friendly product design and packaging to after-the-sale service and engineering support in installation, we are

totally focused on the customer's require-

ments. In the service of the customer we cultivate the problem-solving talents of our employees, whom we consider one of our strongest competitive assets.

*Adding Value at Every Step*

# FACTORY

*Continuous Improvement*

*You may see in them rare flowers of fire, sculptures of crystal, abstract interpretations of the organic and prismatic.*

*We call them Artforms.*

*Inspired by Nature, art, architecture and pure fancy, these are crystal chandeliers for people who would not normally go shopping for a crystal chandelier.*

*Artforms are designed for rooms and spaces that can accommodate high drama. They work best in eclectic and contemporary settings, but wherever they are, they tend to steal the show.*

*No one but Schonbek is capable of producing these designs. Artforms are both high-tech and highly labor-intensive to manufacture, and are therefore beyond imitators.*
