ZOOM

Installation of the glass is the final step in the assembly of this chandelier. Do not assemble the glass first as it is fragile and could break during further assembly.

Turn off the electricity supply at the main circuit panel before installing. Do not connect the electricity supply until your luminaire is fully assembled and installed.

Fix the ceiling bracket (A) to the ceiling by using mounting plugs and screws suitable to your ceiling type.

Place or hold the lamp in an elevated position in such a way that the wires can freely reach the ceiling junction box. Thread the wires through the components and connect the 3 power wires according to their colours. Brown is the live wire, blue is the neutral wire, green/yellow is the earth wire.

Slide the canopy over the ceiling bracket and fix it with the two cap nuts.

Carefully lower the lamp until the chain is taut. Straighten the chain links.

CARE INSTRUCTION
Wipe clean with soft, dry cloth.
Always avoid the use of harsh chemicals or abrasive cleaners as they may cause damage to the fixture's finish.

ASSEMBLY INSTRUCTION

1

- A** = 25 mm long rod
- B** = 40 mm long rod
- C** = 50 mm long rod

Sort the glass according to the numbers.
Start with glass nr 1 and fix it to the 25 mm long rod. Do not tighten the screws too tight, as it might crack the glass.
Follow the schedule as in pictorials to fix the rest of the glass.

Top layer should be glass 1 to 8
Middle layer should be glass 9 to 12
Bottom layer should be glass 13 to 20
